

Ebook Library Starter Guide

There are two ways to access books in EBL. The Online Reader allows you to “check out” books for 24 hours and renew as many times as needed. It is also possible to download books to your computer or portable Ebook reader. Ebooks are always accessible to multiple users at any given time. You can find Ebooks by searching the Library Catalog or searching/ browsing directly in EBL.

How do I find books? You can find books either directly through the EBL site or through the Library Catalog. On the EBL site you can search by author, title, or keyword, or browse all books available (over 18,000) or by category. If you are searching the Library Catalog and a book is available electronically click on the icon labeled “URL” on the item record on the search results page.

Can anybody access EBL books? Using EBL through the Library website requires logging in with your Z number and Cryptocard, so only LANL employees may use this resource.

How long can I use EBL books? Books can be browsed for 5 minutes to decide if it is what you want. After that EBL will prompt you to “create a loan.” Books can be read online or downloaded to your computer. After the 5 minute browse time, if you want to keep the book, a loan is created for 24 hours using the Online Reader. If you choose to download the book, they are available for 1, 7, 14, or 28 days depending on the book. It is possible to create individual collections with the “My Collections” tab to store books for easy future access. EBL also remembers what books you have recently accessed and shows them on your Bookshelf when you log in.

What is the difference between “Read Online” and “Download?” Using the Online Reader, you have access to the book for a loan period of 24 hours. The book can be renewed as many times as you like, and as frequently or irregularly as you need it. You can download books which is particularly handy if you use a portable E-book reader or laptop you will disconnect from the internet. After the loan period expires you will no longer be able to access the book on your device without downloading it again.

How do I use the online reader? After you select a book, the cover will appear in the main portion of the screen with an information box along the left-hand side. The default setting for this box is the Table of Contents for the book. Use the tabs between this section and the book to access different features. The **Details** tab displays information about the book including Title, Author, and Number of Pages. It also allows you to see how much time you have left on your loan as well as printing and copying allowances. The **Search** tab allows you to search the entire text of the book for keywords or phrases. The **Notes** tab allows you to create and export notes about the book. Use the arrow buttons along the top toolbar to navigate through the book. Here you can also change the print size, print or copy sections, and look up words in a dictionary.

Can I print or copy and paste sections of books? EBL has a generous printing/copying policy. You are able to print up to 20% of books and copy/paste up to 5%. Each time you “renew” the short-term loan of a book, the percentage you are allowed to print or copy decreases. Due to copyright law, you are not allowed to print entire books. EBL does monitor the printing/ copying of books so please do not take advantage of these privileges. In order to print/ copy, use the copy and print buttons at the top of the screen. You must be in PDF mode to select text.

Is special software required for reading “Downloaded” books? Yes. EBL requires the use of Adobe Digital Editions, available as a free download at: <http://www.adobe.com/products/digitaleditions/> It is necessary to register with the Adobe site prior to installation. You will need your Adobe username/ password to authorize ADE on your computer or device. Once Adobe Digital Editions is installed on your computer or device, downloaded books will automatically be saved here. When using portable readers, ADE must be installed on both the computer used to download the book and the portable reader. Look at <http://www.adobe.com/products/digitaleditions/devices/> for supported eBook devices.
